ENGRG 1050: Engineering Seminar

All first-year students are pre-enrolled in a section of ENGRG 1050: Engineering Seminar. This 1-credit fall course gives first-year students an opportunity to get to know their faculty advisors on a more personal level. Meeting regularly with their advisees gives advisors an opportunity to learn about each student, to assist in resolving problems as they arise, and to help new students adjust to the demands of the engineering curriculum. Activities in ENGRG 1050 may include discussion of engineering careers, active research in the college and engineering in general, ethics, and workshops on study and exam skills useful to engineering students. Practicing engineers, advising staff, and faculty members from different disciplines may join the group from time to time.
