The Master of Professional Studies in the Information Science program is intended for students who wish to study one or more facets of information science at an advanced level. These areas of study include:

- definition and implementation of information policy
- management and design of information systems
- the design and application of information oriented applications
- dissemination of innovative information media

The program is designed for faculty and students who share an interest in studying information and its social, cultural, economic, historical, legal, and political contexts. Prospective students should have an undergraduate degree that include coursework combining quantitative, technical, and human-centered systems components. Examples of undergraduate majors that may provide such background include computer science, communication, operations research, statistics, economics, psychology, sociology, and science and technology studies.
