Bachelor of Science Degree Program
Graduates earn an accredited Bachelor of Science (B.S.) degree in Chemical Engineering built on knowledge of thermodynamics, fluid mechanics, kinetics and reactor design, culminating in an intense year of laboratory and computer-aided process design that aids their transition from solid technical foundations to polished young professionals. Concentrations within the major include bioprocess engineering, biomedical engineering, food science, electronic materials, polymers and complex fluids, and sustainable energy systems.

Master of Engineering Degree
The flexible Master of Engineering (M.Eng.) degree in Chemical Engineering enables new, as well as practicing, engineers to earn a professional degree in chemical engineering while building expertise in related fields such as:
- Biomolecular Engineering
- Bioprocess Engineering
- Engineering Management
- Electronic Materials
- Environmental Quality
- Energy Economics and Engineering (unique U.S. program)
- Food Engineering
- Materials Science

Industry sponsorship of M.Eng projects is encouraged.
