BE Study Abroad Planning Guide

This plan is offered as a general guide of how one might plan a course sequence if the goal is to incorporate a semester of study abroad into the BE curriculum. It is not the only way to include a semester abroad while meeting degree requirements, but it is a plan that may work for many students. Students should use this as a starting point for planning, discuss options with their advisors, and make use of other advising resources to devise an individual plan. Students should also consult with their major department regarding how any major curriculum changes might impact this plan.
